Karen Norton
Quality Review

This report and the information contained herein represents the results of testing of only those articles/products identified in this document and selected by the client. The tests were performed to specifications and/or procedures approved by the client. National Technical Systems ("NTS") makes no representations expressed or implied that such testing fully demonstrates efficiency, performance, reliability, or any other characteristic of the articles being tested, or similar products. This report should not be relied upon as an endorsement or certification by NTS of the equipment tested, nor does it present any statement whatsoever as to the merchantability or fitness of the test article or similar products for a particular purpose. This document shall not be reproduced except in full without written approval from NTS.

Table 5.1-1: Explosive Atmosphere Test Equipment List	10

1.0 Introduction

This document presents the test procedures used and the results obtained during the performance of an Environmental (ENV) test program. The test program was conducted to assess the ability of the specified Equipment Under Test (EUT) to successfully satisfy the requirements listed in Section 2.0.

2.0 References

The following references listed below form a part of this document to the extent specified herein.

- Test Specification: Military Standard No. MIL-STD-810; G; Method 511.5, Procedure I
- Valhalla Scientific, Inc. Purchase Order(s) 1028, dated 01/14/2022
- National Technical Systems (NTS) Quote(s) OP0605333, dated 01/12/2022
- ISO/IEC 17025:2017(E) *General Requirements for the Competence of Testing and Calibration Laboratories*, dated 11/1/2017

3.0 Product Selection and Description

Valhalla Scientific, Inc. selected and provided the test sample(s) to be used as the Equipment Under Test. Details below:

Table 3.0-1: Product Identification - Equipment Under Test (EUT)

Item	Qty.	Name/Description	Part Number	Serial Number
1	1	Ohmmeter with Intrinsic Fail-Safe Features	4314Ki	67-XXXX

3.1 Received EUT Photographs

Unit ID

3.2 Security Classification

Non-classified

4.0 General Test Requirements

4.1 Test Equipment

The instrumentation used in the performance of these tests is periodically calibrated and standardized within manufacturer's rated accuracies and are traceable to the National Institute of Standards and Technology. The calibration procedures and practices are in accordance with ISO 17025:2017. Certification of calibration is on file subject to inspection by authorized personnel.

5.0 Test Descriptions and Results

Table 5.0-1: Summary of Test Information & Results

Section	Test	Specification	Test Facility	Test Date	Part #	Serial #	Test Result
5.1	Explosive Atmosphere	MIL-STD-810; G; Method 511.5, Procedure I	Fullerton	01/31/2022 - 02/02/2022	4314Ki	67-XXXX	No damage or main chamber detonation noted.

The decision rule for Test Results was based on the Test Specification used for testing.

5.1 Explosive Atmosphere

5.1.1 Test Procedure

MIL-STD-810; G; Method 511.5, Procedure I

5.1.2 Test Result

No damage or main chamber detonation noted as a result of the test.

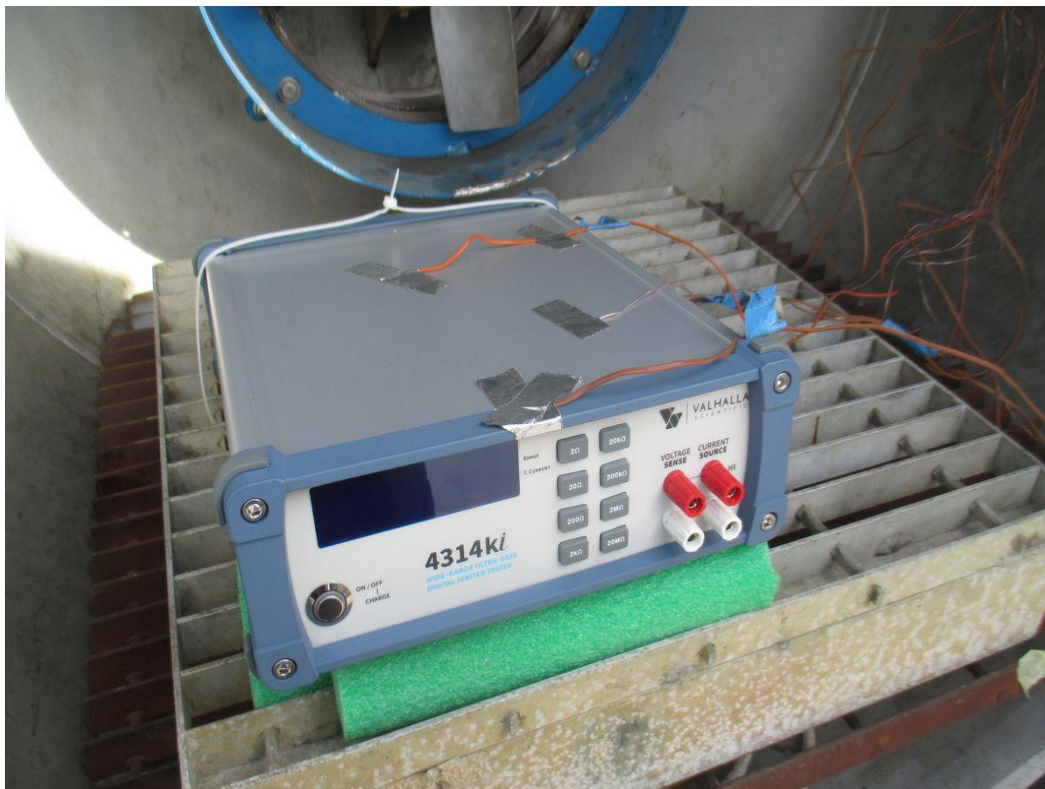

5.1.3 Test Datasheets

Site TEMP:	70F	Site RH:	40.0%	Site BAROMETRIC PRESSURE:	1016.4	hPa
TEST DESCRIPTION						
The Explosive Atmosphere Test was repeated at test altitudes of:						
Test Altitude	Chamber Temp (°C)	Specimen Temp (°C)	Wall Temp (°C)	Specimen Operation	Results	
46,600	50	51	49	Non-op	Inject hexane	
43,300	49	50	50	Operate On-off	Sample ok, unit ok	
40,000	50	50	49	Operate On-off	Continue testing	
36,700	51	51	50	Operate On-off	Sample ok, unit ok	
6,600	50	50	50	Non-op	Inject hexane	
3,300	51	50	50	Operate On-off	Sample ok, unit ok	
152	51	51	50	Operate On-off	Sample ok, unit ok	
REMARKS: No main chamber detonation. Unit On-off during the test						
Post-test visual inspection: No anomalies observed						
CALCULATION:						
Chamber Volume (ft³)	Pressure (PSIA)	Temperature (°C)	Temperature (°R)	Specific Gravity of Hexane @ 25°	Volume 95% Hexane (mL)	
26.14	2.72	50.00	581.70	0.650	27.2ml	
26.14	14.65	50.00	581.70	0.650	120ml	
FORMULA:						
Volume of 95% n-hexane (ml) =		$(150.41) \left[\frac{(\text{net chamber vol (ft}^3\text{)}) \times (\text{chamber pressure (psia)})}{(\text{chamber temp (R)}) \times (\text{specific gravity of n-hexane})} \right]$
